

Fire

The Sudanese Genocide

Unearth the dust
Pull back the curtain, I must
Find out what happened to us
In those years
But you justify
Say you are tryna survive
What are you trying to hide?

The truth is still alive
You can't keep us quiet

Verse

When the smoke clears
All that's left is ashes
And the sickening smell
Of chemical weapons

Pre-Chorus

The words of their mouth stand as
testimony
But it's not enough to make someone
do something
And they stand and watch
And ignite the fire

Chorus

They laugh as they let the world burn
Stand guard and the tables never turn
How many dead and displaced will it
take
For change?

Instrumental

Pre-Chorus

The words of their mouth command us
to bring justice

But it's not enough when we don't
really want it
And we stand and watch
And we fan the fire

Chorus

We laugh as we let the world burn
Stand guard and the tables never turn
How many dead and displaced will it
take?

Bridge

How long before the DUST becomes
unbreakable GLASS
When we finally defeat our own
demons
Our own demons?
Go to the FIELDS
Go to the fields
And stand with them
Be what you should have been
The RIVER becomes blood
Is it enough?
Blood-soaked SOIL cries out
They want us to burn
But memories are ablaze...

Chorus

They laugh as they let the world burn
Stand guard but the tables will turn
We send a signal flare
Hope it gets somewhere

Am I my brother's keeper? (yes, I am)
Am I responsible? (His blood is on your
hands)
We send a signal flare
Hope it gets somewhere
To do something
It is something
